

Ranges

There are certain ingredients a cook simply can't do without. They're the essentials. The items that are a part of every well-stocked pantry. Ingredients like herbs and spices, flour and sugar, rice and pasta. They're valued for their versatility in making a wide range of menu items come to life – much like a Jenn-Air® slide-in or free-standing range.

Consider the Jenn-Air® dual-fuel ranges. These ranges offer an electric self-cleaning convection oven combined with a gas burner cooking surface for the ultimate in cooking flexibility. Ranges featuring an electric oven with two-speed, MultiMode® convection cooking system offer five convection modes for consistently outstanding results, along with Auto Convection Conversion, which takes the guesswork out of convection cooking.

Electric slide-in ranges offer the “Fastest to Boil”^{*} performance of our 9"/6" Custom Control element, combined with an ultra-low setting for heating delicate sauces. Our 12"/9"/6" Triple-Choice™ Element enables the cooking surface and pan size to be more evenly matched for greater versatility. Convenient warming drawers warm plates and breads, or keep food warm and ready to serve at a moment's notice.

Jenn-Air® gas slide-in and free-standing ranges feature a high performance 16,000 BTU PowerBurner that provides quick response and a simmer burner that reduces to 650 BTUs for heating delicate sauces. Select models feature a unique burner that offers the convenience of three settings in one for excellent cooking control and flexibility. Whether you choose a Jenn-Air® professional, slide-in or free-standing range, you'll appreciate the attention to detail that goes into our many distinctive choices. With their incredible combination of cooking flexibility and style, it's no wonder Jenn-Air® ranges have become a staple for today's busy cooks.

^{*}Based on a comparison of leading slide-in range brands with 9"/6" elements on black glass.

PRO-STYLE® RANGES

Jenn-Air® Pro-Style® gas and dual-fuel ranges provide the professional look and performance gourmet cooks are looking for, with features like:

Stainless steel towel bar handle with diamond-etched grip offers a bold look and embellished grasp for ease of opening and closing the oven door. **Oversized knobs** on the upfront control panel add to the commercial look and offer infinite settings for complete cooking control.

Gas cooking surfaces feature **Dual Flame™ burners** that provide quick heat-up for rapid boiling and pan searing, yet reduce to an ultra low setting ideal for heating delicate sauces. A **modular, down-draft model** is also available that includes our **E-ven-Heat™ grill assembly** plus an ultra high output PowerBurner and a simmer burner (shown on page 34). To combine gas and electric cooking advantages, **dual-fuel models** are available with a self-cleaning electric convection oven.

Adding a **stainless steel backsplash** to your range creates a dramatic kitchen focal point. A **matching hood** and **soffit chimney** are also available.

Whether your kitchen space is designed for a free-standing range, slide-in range, or downdraft range, Jenn-Air has a Pro-Style® model that will add power and beauty to your home.

SLIDE-IN RANGES

Jenn-Air® slide-in ranges coordinate beautifully with surrounding cabinets for a built-in style that complements any décor. They also offer plenty of cooking versatility, thanks to features like these:

Menu-driven oven controls with VFD display guide the cook through a variety of selections and options, making oven operation smooth. Keypad entry offers precise time and temperature settings. Two timers make it easy to keep track of what's cooking on the surface and in the oven. Several control functions may be customized allowing personalization of the range to individual needs.

A **variety of cooktop surfaces and cooktop-oven combinations** are offered. Gas and electric modular models offer indoor grilling any time of the year and the option of replacing the grill with burners or

cartridges. Self-cleaning ovens are available with bake/broil function or with added MultiMode® convection options. Dual-fuel models provide a gas cooking surface and an electric convection oven. Gas models provide sealed burners, electric models feature smooth glass-ceramic surfaces, and both types have ultra high and ultra low heating capabilities. Downdraft models keep the kitchen air fresh and can be installed in peninsula or island settings. With Jenn-Air® slide-in ranges, the choices go on and on, ensuring you'll find a model perfectly suited to your kitchen design.

Choose from **Pro-Style® Stainless** models with commercial styling, **Euro-Style Stainless** design with sleek stainless steel accented by the subtle appeal of curved fronts and stainless steel towel bar handles or **Floating Glass** design with smooth and elegant curved glass fronts and stainless steel towel bar handles.

EVENTHREE™ SEALED BURNER

The unique design of our EvenThree™ sealed burner offers the power of 15,000 BTUs for quick heat-up (both rings lit on high setting), along with a versatile 3,000 BTU setting (inner ring only lit on high) and a 750 BTU warm setting (inner ring on low setting) for excellent cooking control and flexibility in a single burner position.

AN INSIDE LOOK. Always attractive on the outside, you'll find that Jenn-Air® slide-in ranges offer an appealing array of gourmet features on the inside too. Models are available with **4.3 cu. ft. or 4.5 cu. ft. ovens**, the largest capacity available among slide-in ranges. **Two-speed, MultiMode® convection** features a unique butterfly element and offers five convection modes including Convection Bake, Convection Roast, and Convection Pastry, along with the ease of Auto Convection Conversion. Plus the unique **Drying Option** means you can easily dry herbs, vegetables, fruits, and even flowers, year round. And the **Thaw and Serve option** thaws ready-to-serve frozen foods such as pies and cakes conveniently and easily. Our **Bread Proofing feature** protects bread dough from room temperature changes or drafts while yeast is rising. All models feature **Cook & Hold, Favorite Settings and Keep Warm™ options** that make preparing and serving gourmet foods easier than ever.

MULTIMODE®
CONVECTION

TWO-SPEED
MULTIMODE®
CONVECTION

See pages 124, 126 and 133 for complete features and specifications.

Jenn-Air® Slide-In Ranges with Downdraft Ventilation have a two-speed fan that pulls smoke, steam and cooking odors down and out of the kitchen, eliminating the need for an overhead hood. Modular models are available with a grill assembly and two sealed burners (gas models), or an open bay which accepts a radiant or coil element cartridge (electric models). The grill assembly is interchangeable with cooking cartridges, or can be used with the griddle accessory for even more cooking flexibility. Models are also offered that combine the advantages of downdraft ventilation with the sleek, smooth style of our glass-ceramic cooking surface.

9"/6" CUSTOMCONTROL ELEMENT

Our CustomControl element utilizes an electronic sensor to constantly monitor and adjust heat output for precise, consistent temperature control. Thanks to its "Fastest to Boil"® performance, the ultra-high setting heats stir-fry with ease while ultra-low settings are perfect for sauces.

*Based on a comparison of leading slide-in range brands with 9"/6" element on black glass.

Jenn-Air® slide-in electric ranges offer a variety of element choices and combinations. Our **9"/6" CustomControl element** provides "Fastest to Boil"* performance along with an ultra low setting for maximum heating efficiency. You'll appreciate the flexibility of the extra large **12"/9"/6" Triple-Choice™ element** or **9"/6" Dual-Choice™ element** that maximizes heating power for larger pans, yet may also be used for small pans. The **6" Cook and Warm element** provides the flexibility of a fully-functioning cooking element that reduces to an ultra low setting for keeping food warm. And the **Warming Center™ element** is designed just for keeping food warm while the finishing touches are put on the meal.

**Based on a comparison of leading slide-in range brands with 9"/6" element on black glass.*

SHOWN: JDR8895AAS 30" DUAL-FUEL DOUBLE OVEN RANGE WITH CONVECTION, JMV8208AAS 30" OVER-THE-RANGE MICROWAVE.

FREE-STANDING RANGES

Designed to be stylish, dependable and versatile, Jenn-Air® free-standing ranges are the ideal choice for any cook.

Two-speed, MultiMode® convection provides Convection Bake, Convection Roast and Drying capabilities for outstanding results.

Auto Convection Conversion automatically converts your recipes to the correct convection time and/or temperature settings, making convection cooking easier than ever!

Cook & Hold setting automatically adjusts to a Keep Warm™ setting for up to an hour once preset cook time has expired – a real convenience with today's busy schedules.

5.22 cu. ft. overall capacity provides ample space to cook an entire meal with ease.

30" DUAL-FUEL DOUBLE OVEN WITH CONVECTION JDR8895AA

COOKTOP FEATURES:

- 5 gas sealed burners including an ultra high performance 16,000 BTU PowerBurner ► Ultra low output burner that reduces to 600 BTUs ► Electronic ignition
- Matte black burner grates and caps

UPPER OVEN FEATURES:

- 1.22 cu. ft. oven with bake, broil, toast and keep warm features ► CustomClean™ self-cleaning oven with auto-lock
- Electronic oven controls

LOWER OVEN FEATURES:

- 4.0 cu. ft. bake/broil oven with MultiMode® convection ► Auto Convection Conversion ► CustomClean™ self-cleaning oven with auto-lock ► Electronic oven controls ► Proofing, Cook & Hold, Favorite Setting and Keep Warm™ options ► 5 oven rack positions
- Available in Euro-Style Stainless design with black accents (shown) or Floating Glass in black or white, with Euro-Style stainless steel towel bar handles

The first Jenn-Air® **Dual-Fuel** Double Oven Range with gas cooking surface and electric double ovens allows you to cook two different foods at two different temperatures, and it fits in the same space as a standard range. The 1.22 cu.

ft. upper oven is fully-equipped with bake, broil, toast and keep warm functions. Plus, it preheats in half the time as a full-sized oven. The lower oven features 2-speed MultiMode® convection for complete cooking versatility.

FREE-STANDING ELECTRIC RANGES

Extra-large 12"/9" Dual-Choice™ element, the industry's largest*, maximizes heating power for larger pans.

Convenient **warming drawer** is an ideal way to warm breads and plates, or keep food warm.

Two-speed, MultiMode® convection provides Convection Bake and Convection Roast capabilities. A third element enhances the convection system for outstanding results.

Hidden bake element provides a smooth surface in the bottom of the oven that is easy to wipe clean and prevents spills from burning onto the element.

*Excluding Maytag family of brands.

- (Not available in Canada)

FREE-STANDING GAS RANGES

Two-speed, MultiMode® convection provides Convection Bake and Convection Roast capabilities for outstanding results.

5 sealed burners provide easy cleanup and greater cooking flexibility with a burner at the center of the cooking surface that reduces to 600 BTUs.

High performance 16,000 BTU burner offers quick heat-up for boiling, and provides the power you need when you're cooking for a crowd.

The Create-A-Space™ half-rack converts from a full-width rack to a convenient half-rack, enabling you to fit side dishes into the oven without sacrificing space needed for larger items on the main rack.

30" FREE-STANDING GAS WITH CONVECTION JGR8875QD

- 5 sealed burners including an ultra high performance 16,000 BTU PowerBurner ➤ Ultra low output burner that reduces to 600 BTUs
