

# KITCHENAID®

## DISHWASHERS & COMPACTORS

FOR THE WAY IT'S MADE.®

FOR THE WAY IT'S MADE.®

## A FULL MENU OF INGREDIENTS TO STIR YOUR CULINARY PASSION.

Throughout its long history, KitchenAid has remained true to its roots as the brand for those who love to cook. From chopping your fresh ingredients to rinsing the last of your stemware, every product and innovation that carries the KitchenAid name is designed with a single goal: to be an essential ingredient in every cook's kitchen.

Our full-line of countertop and major appliances includes a complete line of cleaning essentials. In addition to the signature performance of our full-size dishwasher, we offer attractive design options with our drawer dishwasher and innovative briva® in-sink dishwasher. And only KitchenAid offers a trash compactor and a full prep suite of faucets, hot water dispensers, and stainless steel sinks. The coordinated style takes your ideas for cleanup and food preparation in new directions.

# SOMETHING SENSATIONAL BEHIND EVERY DOOR.

KitchenAid makes it easy for you to select a dishwasher that fits your kitchen design. Our expanded Architect® Series line includes three exterior door designs. A fully integrated console keeps the controls completely hidden for a sleek, uninterrupted line from top to bottom. A fully integrated console with display gives feedback on cycle status and time, and a fully visible console puts all the cycles and displays within easy reach. All Architect® Series dishwashers feature the robust style of our Architect® Series handle. If you prefer a traditional look, our classic console dishwasher features up-front controls and a 4-inch high console that complements most cabinet drawers. And once you've decided on the look and color you want, you can choose one of three performance packages. Each package delivers powerful sensor-enhanced washing and drying performance. P Series™ and S Series™ dishwashers offer additional cleaning and loading options for the types of dishes, pots and pans, and utensils that you wash most frequently. Once you're finished, you'll have a dishwasher that complements your entire food prep and cleanup routine.

# VERSATILE LOADING OPTIONS FOR THE WAY YOU COOK.

KitchenAid has created an innovative option for loading and cleaning extra-large utensils and silverware. The Culinary Tool Rack\* fits above the middle rack to give you additional room for storing an assortment of the specialty items that you use when you cook. Like the middle rack, the Culinary Tool Rack can be adjusted in an upper or lower position that is determined by your space needs. When positioned horizontally, two removable baskets provide the depth you need to hold extra-large items like skewers, ladles, and spatulas. Turned vertically, the baskets are an ideal choice for silverware, while providing more room to load tall items in the middle rack. And with silverware in the Culinary Tool Rack, the silverware basket can be removed from the lower rack, giving you more room for other large items.

When you're not using the Culinary Tool Rack, it can be removed and the baskets can be placed inside a standard kitchen drawer for storage.

\*Available on S Series™ dishwashers.

KSW80C0MMR Sink, KKFV01PPSS Faucet. Cabinetry by Decorá.® Cabinet  
Hardware by Cliffside Industries, Ltd. Corian® Solid Surface by DuPont.

# CLEANING PERFORMANCE FOR YOUR TOUGHEST CHALLENGES.

Through continuous research, we develop innovations like our ProScrub™ option.\* You can load large items, like grilling pans that have heavy, baked-on soils, in front of the high-powered spray jets along the back of the lower rack. During the cycle, the water pressure moving through the jets increases at frequent intervals to provide thorough cleaning without prerinsing. When you don't have dishes that require this type of attention, the ProScrub™ option can be turned off, and you still get powerful wash performance that's part of our multi-level, sensor wash system. As part of this enhanced wash system, all KitchenAid® dishwashers feature our Optimum Wash Sensor. Most dishwasher sensors only detect the type of soils present. However, cleaning performance is often affected by the quality of water entering the dishwasher. In the first cycle, this sensor detects if you have hard or soft water and the type of soils present. The cycle is then adjusted to help optimize energy, water, and rinse aid consumption. If you suspect you have hard water, adding a little extra detergent will also help ensure optimum cleaning results.

\*Available on S Series™ dishwashers.

Shown: KIDS36PSS briva® In-Sink Dishwasher, KKFV01PPCR Faucet, KUDD01DPPA Dishwasher, KSW80COMMR Sink, KKFV01SPSS Faucet, KHVG160P Hot Water Dispenser.

# ALTERNATIVE DESIGNS EXPAND YOUR CLEANING OPTIONS.

KitchenAid offers two advanced dishwasher designs that create new possibilities for your kitchen. The drawer dishwasher delivers the powerful performance of two dishwashers in the same space as a regular full-size dishwasher. This allows you to blend traditional cleaning and food prep applications into an integrated kitchen design. The drawer dishwasher is a perfect fit with European-style cabinets

and – with a depth of less than 24 inches it can be placed where you want – including areas outside the kitchen.

The briva® in-sink dishwasher fits into the space of a sink. The energy-efficient design and fast cycles encourage you to wash loads that would be considered too small for a full-size dishwasher. When you're not using the in-sink dishwasher to wash dishes, you can remove its rack and spray arm, creating a 15-inch deep second sink that holds stockpots and adds space for quick cleaning tasks.

# AN ESSENTIAL PART OF EVERY SPOTLESS KITCHEN.

A KitchenAid® trash compactor is an effective way to reduce trash volume and maintain a spotless kitchen. In addition to helping you keep your trash volume to a minimum, trash compactors are environmentally responsible, and assist your recycling efforts by providing a dedicated area for items like aluminum cans, plastic bottles, or paper products. At 15 inches wide, a trash compactor can be placed inside a pantry, entertainment center, or anywhere in a home where a large amount of trash is being generated. A key feature of every KitchenAid® trash compactor is the Solid Pack™ control. When this feature is selected, continuous pressure is applied to the contents of the compactor even when it is off. This constant pressure compresses trash to approximately 25% of its original size – you'll take out the same amount of trash using ¼ of the bags. And, select trash compactors provide an effective and economical odor management system with an air freshener in addition to a charcoal filter. An odor-control fan assists with strong odors. This combination of a filter and a fan is more effective than the use of solid deodorants.

# KITCHENAID® PREMIUM FEATURES

## KITCHENAID'S MOST VERSATILE DISHWASHER.

The versatile design of a KitchenAid® dishwasher **gives you many options for maximizing usable space.** In the S Series™ performance package, you get the most versatility. In addition to our Culinary Tool Rack and adjustable middle rack, you get removable rack inserts for customized storage options. The middle rack features a removable bowl insert that snaps in and out. The lower rack features single rack and double rack inserts for plates and pots. **Both racks have tines that fold down for additional options.** When you select a P Series™ dishwasher, you'll enjoy an adjustable upper rack that can be raised

two inches to allow 11-inch plates to fit in both the upper and lower racks and a 3-piece cutlery holder that provides safe, accessible storage for knives.

All KitchenAid® dishwashers have standard loading options. The tine height and spacing have been specially designed to hold dishes of all shapes and sizes – including elegant, fine china. And, the DuraKote™ nylon-coated racks feature Cushion-Tip™ tines for added protection.

## YOU'LL ONLY PRERINSE BECAUSE YOU WANT TO.

With a KitchenAid® dishwasher, you will be prepared to handle your toughest cleaning challenges. All KitchenAid® dishwashers feature our Optimum Wash Sensor. If your water is hard, the dishwasher will be able to tell, and make necessary adjustments that will help optimize your cleaning performance and use of water, energy, and rinse aid. This is in addition to our powerful 5-level wash system that features a hard-food disposer and automatic cleaning filter. **There's no filter to clean by hand and it's not necessary to prerinse dishes before you wash them.** With the S Series™ dishwasher, you can include **your grilling pans with tough, baked-on or greasy soils with the rest of your dishes.** By selecting our new ProScrub™ option, dishes in the back of the lower rack are washed clean with powerful, precise jets of water.

Once dishes are clean, our AccuVent™ system makes sure they get dry. Steam is released through the front of the dishwasher – away from glasses, dishes, and the tub and door.

As a result, dishes are dry at the end of the cycle and so is the interior of your dishwasher.

whisper quiet®  
system

## QUIETLY HANDLES YOUR DIRTIEST DISHES.

KitchenAid® dishwashers are known for quiet operation. And this line is **the quietest dishwasher line we've ever made**. Our Whisper Quiet® sound reduction system provides premium sound insulation that increases with each feature package. The dishwasher is so quiet, you'll wonder if it's running.

## THE PRODUCT OF 57 YEARS OF RESEARCH AND INNOVATION.

Every KitchenAid® dishwasher builds on our 57-year heritage. Standard features like a hard-food disposer and Whisper Quiet® operation tell our story better than we can. KitchenAid® dishwashers are **built to provide years of unmistakable excellence**. You'll also appreciate the **commercial-grade stainless steel interior that helps resist streaks, stains, and odors** while providing optimum heat transfer for exceptional drying performance. All of this is in addition to a **tall-tub design that fits in the space of a standard dishwasher cutout**.

STYLE	HEIGHT (H)	WIDTH (W)	THICKNESS (T)
Fully Integrated Console	30	23 <sup>3</sup> / <sub>8</sub>	<sup>3</sup> / <sub>4</sub>
Classic Console	25 <sup>29</sup> / <sub>32</sub>	23 <sup>3</sup> / <sub>8</sub>	<sup>3</sup> / <sub>4</sub>

\*Detail A does not apply to fully integrated console.

# PEDESTAL DIMENSIONS

## Pedestal Dimensions

## Pedestal Custom Panel Dimensions

## Pedestal Cutout Dimensions

Dimensions shown when installed with a KUDS, KUDP, or KUDI Series model.

**IMPORTANT:** If dishwasher and pedestal are installed at end of countertop, a full enclosure must be provided.

# DRAWER DISHWASHER DIMENSIONS & SPECIFICATIONS

\*If custom wood panels are to be used, the product depth is specified with an  $\frac{1}{16}''$  door panel thickness.

\*\*Toe kick depth:  
Factory supplied –  $2''-4\frac{3}{8}''$ ;  
Custom wood –  $5''$  less the toe kick panel thickness for integrated.  
Minimum panel thickness using the supplied screws is  $\frac{3}{8}''$ .

\*\*\*Door front height:  
Factory supplied –  $30''$ ;  
Custom wood –  $28\frac{1}{4}''$  min.

**NOTE:** Product shown with front panels for dimension purposes.

It is recommended that wood cabinetry surrounding the dishwasher be sealed with an oil based paint or moisture-proof polyurethane to prevent possible damage from heat and humidity.

The utility hole must be located as shown. If the hole is not located as shown, the hoses will prevent the dishwasher from being pushed back all the way into the cavity. Make sure the edges of the utility hole are smooth or covered. If the utility hole is through a metal cabinet, the hole must be protected with the edge protector provided.

**\*IMPORTANT:** Custom wood door panels, if used, may be wider than the dishwasher to match surrounding cabinets. The  $23\frac{5}{8}''$  must be increased so that there is a  $\frac{1}{4}''$  clearance between the cabinet side and panel edge. For corner installation, there must be a  $\frac{1}{2}''$  space between the adjacent cabinet doors (i.e. door knobs) and open dishwasher drawer.

# DRAWER DISHWASHER CUSTOM PANEL DIMENSIONS

**NOTE:** Do not cut beyond outline of medallion cutout shown above.  
Rout a  $\frac{1}{4}"$  radius around back side of medallion cutout.

Upper and lower panel minimum thickness is  $\frac{5}{8}"$ . Panel thickness above  $\frac{11}{16}"$  can be accommodated but product depth will increase accordingly.

Custom front panel material must be suitable for damp conditions or adequately sealed to withstand moisture. Using a moisture resistant material can provide additional protection. Taping edges alone may not provide adequate sealing. For painted panel, paint all rear edges to improve sealing.

# briva® IN-SINK DISHWASHER PRODUCT DIMENSIONS & SPECIFICATIONS

## FRONT VIEW

## SIDE VIEW

Dimensions are for planning purposes only. For complete details, see Installation Instructions packed with product. Specifications subject to change without notice.

# briva® IN-SINK DISHWASHER CUTOUT DIMENSIONS & SPECIFICATIONS

**\*Note:** The cutout must be accurately cut to the dimensions shown within **1/16"** Dishwasher top flange overlaps the countertop cutout by **7/16"** on front and back edges and **1/4"** on sides.

- Cabinetry and countertop must be sturdy enough to support loaded dishwasher and sink (400 lbs.).

If installing the optional hot water heater, refer to the Installation Instructions packed with product for detailed information.

## TRASH COMPACTOR CUSTOM PANEL DIMENSIONS

Shown in inches.

MODEL NO.	KUCS02FR	KUCS02CR	KUCP02IR
Height	29 $\frac{3}{8}$	25	23 $\frac{13}{16}$
Width	15	15	15
Thickness*	$\frac{1}{2}$ Min.	$\frac{1}{2}$ Min.	$\frac{1}{2}$ - $\frac{5}{8}$

\*Thicker panel may require routing and, if applicable, cutout for access to handle.

Dimensions are for planning purposes only. For complete details, see Installation Instructions packed with product. Specifications subject to change without notice.

## GLOSSARY OF KEY FEATURES AND TERMINOLOGY – DISHWASHERS

### **AccuVent™ Drying**

Steam is vented through the front of the dishwasher – away from the glasses, dishes, tub, and door. Promotes fast drying and keeps the dishwasher interior from retaining moisture and odors.

### **Balanced Door**

A solid door-hinge system that allows the door to be stopped at multiple positions when loading or unloading.

### **Control Lock Option**

Disables all of the buttons on the dishwasher to prevent accidental or unwanted operation.

### **Culinary Caddy® Utensil Basket**

This exclusive feature provides convenient storage for items that need to be secured. Available on P Series™ dishwashers and S Series™ dishwashers.

### **Culinary Tool Rack**

A removable third rack that fits above the middle rack and provides a space for extra-large culinary tools like whisks, spatulas, and knives. Available on S Series™ dishwashers.

### **Cushion-Tip™ Tines**

The tips of the nylon racks are rounded to absorb shock and protect dishes from scratching and marring. They also help to keep items securely in place.

### **Cutlery Holder**

A special basket on the side of the lower rack that provides secure storage for three large knives. Available on P Series™ dishwashers.

### **Delay Wash Option**

Delays the start of a selected wash cycle for up to four hours in one-hour increments.

### **DuraKote™ Nylon-Coated Racks**

Protect against rust and peeling and carry a five-year warranty (see dealer for warranty details).

### **Energy Saver™ Dry Option**

Eliminates heat during the drying segment of the selected cycle. The fan continues to operate, helping the dishes to dry naturally.

### **ENERGY STAR® Qualified**

KitchenAid® dishwashers are ENERGY STAR® qualified. They are designed to use less energy, help save money on utility bills, and help conserve our natural resources.

®ENERGY STAR is a U.S. registered mark.

### **Hard-Food Disposer**

Grinds down small food particles so they can pass through the automatic cleaning filter without redepositing onto dishes.

### **Hi-Temp Scrub Option**

Enhances the Normal, Heavy, and Baked-On Cookware cycles. When selected, this option adds an extra rinse and increases the temperature to provide better cleaning for tough baked-on soil removal.

### **Hydro Sweep™ 5-Level Direct-Feed Wash System**

Directs water from the rear of the tub. This wash system helps ensure that items in the lower rack won't restrict the flow of water to the upper rack. Other features include a 4-way stainless steel wash arm, hard-food disposer, and automatic cleaning filter.

### **Hydro Sweep™ Wash Arm**

Four stainless steel wash arms – each with precision wash jets – send water to every corner of the tub. This efficient distribution system maximizes water-flow rates and helps reduce operating costs.

### **NSF® International**

An independent organization committed to public health and safety for over 50 years. The Sani Rinse™ option on KitchenAid® dishwashers has NSF® certification.

### **Optimum Wash Sensor**

A digital sensor that recognizes water hardness and the type of soils and automatically adjusts the cycle to optimize energy, water, and rinse aid consumption.

### **ProScrub™ Option**

Provides precise, powerful bursts of water concentrated to a specific area in the back of the lower rack for large, hard-to-clean items like grilling pans and stockpots. Available on S Series™ dishwashers.

### **Sani Rinse™ Option**

Boosts the final water temperature to 160°F providing the high wash temperature required to sanitize dishware.

### **Satinglide® Ultra Rack**

Features a stainless steel glide system that makes it easy to move up to 40 pounds of dishes with just one finger.

### **Stainless Steel Tall Tub**

Accommodates up to 14 place settings\* and fits in the space of a standard cutout.

\*12 place settings in S Series™ dishwashers.

### **Sure-Hold® Cup Shelf and Stemware Holder**

Flexible, fold-down tines that are designed to hold multiple pieces of silverware. When not being used for stemware, the tines can be used as a cup shelf.

### **Sure-Hold® Small Items Pouch**

A nylon pouch that secures small, light-weight items during the wash cycle. Available on S Series™ dishwashers.

### **Whisper Quiet® Sound Insulation System**

A four-level system that defines the level of quiet operation.

- S Series™ – Whisper Quiet Ultima™ sound insulation system (50 dBA/3.3 Sones)
- P Series™ – Whisper Quiet® Plus sound insulation system (54 dBA/4.6 Sones)
- I Series™ – Whisper Quiet® sound insulation system (56 dBA/5.3 Sones)

## GLOSSARY OF KEY FEATURES AND TERMINOLOGY

### DRAWER DISHWASHERS

#### **ADA/Fair Housing Compliant**

KitchenAid® drawer dishwashers comply with the regulations for fair housing set by the Americans with Disabilities Act. By not extending the leveling legs, the drawer dishwasher is 32½ inches tall, which will fit beneath the ADA-required 34-inch compliant countertop height.

#### **Control Lock Function**

Disables all of the buttons on the dishwasher to prevent accidental or unwanted operation.

#### **Delay Wash Option**

Delays the start of a selected wash cycle for up to 12 hours in one-hour increments.

#### **ENERGY STAR® Qualified**

KitchenAid® drawer dishwashers are ENERGY STAR® qualified. They are designed to use less energy, help save money on utility bills, and help conserve our natural resources.

®ENERGY STAR is a U.S. registered mark.

#### **Flexi-Basket™ Silverware Basket**

The silverware basket can be split apart. When separated, one or both sections can be placed into the rack in several locations. Each drawer has a basket.

#### **Hi-Temp Wash Option**

Use with the Heavy cycle for baked-on cookware or with any cycle when a higher main wash and/or rinse temperature is needed. Boosting the temperature can help optimize wash performance and assist with drying.

#### **Nylon-Coated Racks**

Protect against rust and peeling and carry a five-year warranty (see dealer for warranty details).

#### **Quick Clean Cycle**

A 38-minute wash cycle\* to clean up cookware prior to entertaining. Towel drying may be needed after running the cycle.

\*Without Hi-Temp wash option.

#### **Rinse Aid Dispenser**

Holds liquid rinse aid and automatically adds proper amount during the final rinse to help improve drying.

#### **Star-K**

KitchenAid® drawer dishwashers are endorsed by STAR-K KOSHER CERTIFICATION for use on the Jewish Sabbath or the Jewish Holidays.

#### **Stemware Holders and Cup Shelves**

Flexible fold-down tines that hold multiple pieces of stemware. Can also be used as a cup shelf.

#### **Sure-Hold® Light Item Clips**

The retainers on the tines of the Sure-Hold® rack inserts. These are used to hold lightweight items in place during washing.

#### **Sure-Hold® Removable Rack Inserts**

Allow the rack to be adjusted for different load types. One or more inserts can be removed to customize the rack for a particular load.

#### **Whisper Quiet Ultima™**

#### **Sound Insulation System**

Helps to maintain a quiet home environment during dishwasher operation.

## briva® IN-SINK DISHWASHERS

### Direct-Feed Wash System

Water is channeled directly into the spray arm creating more usable space and providing thorough water coverage.

### FlashDry® Instant Drying

Describes the process at the end of each cycle where the lid automatically pops open allowing steam to escape to facilitate fast, efficient drying.

### High-Performance Water Heater

An optional high-performance water heater that allows incoming water to quickly reach the proper temperature up to 160°F – resulting in shorter, more efficient cycles.

### Normal Wash Cycle

A wash cycle for handling your everyday loads. This cycle runs up to 25 minutes with the optional high-performance water heater or up to 35 minutes without the water heater.

### Pots and Pans Cycle

A wash cycle for handling heavily soiled pots and pans. This cycle runs up to 40 minutes with the optional high-performance water heater or up to 55 minutes without the water heater.

### Quick Wash Cycle

An 18-minute cycle when the briva® in-sink dishwasher is equipped with the optional high-performance water heater.

### Rinse Aid Dispenser

Holds liquid rinse aid and automatically adds proper amount during the final rinse to help improve drying.

### Rinse Only Cycle

A 2-minute rinse cycle for cleaning bowls or other utensils that may be needed multiple times during the cooking process.

### Sani Rinse™ Option

Boosts the final water temperature to provide the high wash temperature required to sanitize dishware.

### Whisper Quiet® Sound Insulation System

Helps to maintain a quiet home environment during dishwasher operation.

---

## TRASH COMPACTORS

### Drawer Opener Pedal

Allows the trash compactor to open by applying slight pressure on the easy-action, full-width pedal.

### Forced-Air Activated Charcoal Filter

Allows air to pass through for quick removal of strong or lingering odors. Available on all trash compactors.

### 4:1 Compaction Ratio

A 4:1 ratio means that four bags of trash are reduced to one bag, when compacted.

### Solid Pack™ Control

Keeps the ram at the bottom of the compactor until the compactor is restarted to maintain pressure on the load. Because of this tight compaction, Solid Pack™ operation increases trash bag capacity.

### Twin-Screw Drive System

Two screws keep the compaction force even as the ram exerts 2,300 pounds of force during operation. The geared chain drive helps prevent slippage.

## THE PREP SUITE FROM KITCHENAID.

To help you create an integrated area for food prep and cleaning, KitchenAid has developed the Prep Suite. These coordinated packages offer selections that fit most standard countertop/cabinet openings, or give you the inspiration to design a more efficient kitchen. You can also create your own Prep Suite. Visit [KitchenAid.com](http://KitchenAid.com) for more alternatives.

### **Advanced Prep Suite – Featured Products**

- briva® In-Sink Dishwasher
- Stainless Finish Kitchen Faucet
- Solid Maple Cutting Board
- Heavy-Duty Food Waste Disposer
- Stainless Finish Sink Strainer

### **Essentials Prep Suite – Featured Products**

- 18-Gauge Stainless Steel Sink
- Stainless Finish Kitchen Faucet
- 60-Cup Hot Water Dispenser
- Heavy-Duty Food Waste Disposer
- Stainless Finish Sink Strainer

## EVERYTHING A COOK NEEDS.

KitchenAid offers a full-line of countertop, built-in, and freestanding appliances. You may want to consider one of the following products to go along with your dishwasher purchase.

### **Tailored laundry solutions for your home.**

The Ensemble™ laundry pair fits the modern laundry room. The sleek design includes a two-year warranty and a matte, metallic finish to complement commercial-quality features.

### **Expand your food preservation options.**

A versatile double-drawer refrigerator offers supplemental refrigerator storage where it's needed most. With true independent temperature control, different items can be stored at different temperatures. And, the KitchenAid® double-drawer refrigerator has a usable storage area that is among the largest in the industry.

### **Our heritage gives you more options for your kitchen.**

Our knowledge of the things that are important to cooks helps ensure you can outfit your entire kitchen with KitchenAid® quality. From prep to cleanup, on the counter or under the counter, KitchenAid® appliances can help provide a more satisfying kitchen experience. One look at our line of food processors, spice grinders, blenders, and cook's tools – and you'll understand why there's so much more to our reputation than our legendary stand mixer.

\*Based on a September 2003 survey, KitchenAid was found to be the home kitchen appliance brand chosen most often by members of the International Association of Culinary Professionals.
