

## KITCHENAID® DISHWASHERS – THE TRADITION CONTINUES.

The heritage of KitchenAid extends to a high-performance line of dishwashers that give you expanded cleaning capability for large and hard-to-clean dishes. You'll also enjoy features that add versatility for loading whatever you want, wherever you want. And we've expanded our Architect® Series line to include a wider range of door styles and colors. You'll be able to find a look to match your kitchen design.

### KITCHENAID® DISHWASHERS

#### VERSATILE LOADING OPTIONS FOR THE WAY YOU COOK.

The Culinary Tool Rack\* is a removable third rack for loading and cleaning **an assortment of the specialty items** that are part of your cooking routine. The Culinary Tool Rack fits above the upper rack, and **can be adjusted in an upper or lower position** that is determined by the placement of two removable baskets. When positioned horizontally, the baskets provide the depth you need to hold extra-large items like skewers, ladles, and spatulas. Turned vertically, they are an ideal choice for silverware, while providing more room to load tall items in the upper rack. And with the Culinary Tool Rack, the silverware basket can be removed from the lower rack, giving you more room for other large items. When you're not using the Culinary Tool Rack, the baskets can be placed inside a drawer for storage.

\*Available on S Series™ dishwashers.

#### CLEANING PERFORMANCE FOR YOUR TOUGHEST CHALLENGES.

All KitchenAid® dishwashers feature our Optimum Wash Sensor as part of an enhanced wash system. Most dishwasher sensors only detect the type of soils present. However, cleaning performance is often affected by the quality of water entering the dishwasher. In the first minutes of a cycle, this sensor detects if you have hard or soft water and the type of soils present. **The cycle is then adjusted to help optimize energy, water, and rinse aid consumption that is closely tailored to your water supply.** If you suspect you have hard water, adding a little extra detergent will also help ensure optimum cleaning results. S Series™ dishwashers feature the added benefit of our ProScrub™ option. Dedicated, high-powered spray jets in the back of the lower rack increase water pressure at frequent intervals to a targeted area of the dishwasher. **It's an ideal feature for handling large items like grilling pans.**

#### whisper quiet® system

#### QUIETLY HANDLES YOUR DIRTIEST DISHES.

KitchenAid® dishwashers are known for quiet operation. And this line is **the quietest dishwasher line we've ever made.** Our Whisper Quiet® sound reduction system provides premium sound insulation that increases with each feature package. The dishwasher is so quiet, you'll wonder if it's running.
