

Turns the Kitchen into A Complete Cleanup Center.

Make a KitchenAid® trash compactor part of your efficient, integrated kitchen. These 15-inch wide compactors can extend beyond the kitchen – into pantries, entertainment centers, or anywhere throughout the home. In addition to reducing trash volume, a compactor is environmentally responsible – providing a dedicated storage area for aluminum cans, plastic bottles, and paper products.

KITCHENAID® TRASH COMPACTORS

COMPRESSES TRASH TO 25% OF ITS ORIGINAL SIZE.

When the **Solid Pack™** feature is selected, pressure is applied to the contents even when the compactor is off. The constant pressure allows trash to be **compressed to approximately 25% of its original size** – you'll take out the same amount of trash using ¼ of the bags.

HELPS FILTER UNPLEASANT ODORS.

KitchenAid® Superba® Series trash compactors provide an **effective and economical odor management system with an air freshener that releases a pleasing scent**. All compactors have a forced-air activated charcoal filter to help **continuously remove odors for**

up to one year. For strong odors, an odor-control fan speeds the circulation of air. This combination of a filter and a fan is more effective and economical than the use of solid deodorants.

DESIGNED TO MATCH YOUR KITCHENAID® DISHWASHER.

A **fully integrated design** puts the controls on the interior of the compactor. The sleek exterior provides an uninterrupted line. Other design options are a framed, **fully visible console** on the outside of the compactor, or a **classic console**. Architect® Series compactors feature wrap-around stainless steel panels and accept custom panels. All other compactors give you a choice of traditional colors.

THE CRAFTSMANSHIP YOU EXPECT FROM KITCHENAID.

The drawer opener pedal allows you to open the compactor even when your hands are full. As it does, you'll appreciate how the bin **glides out smoothly even under the weight of heavy loads**. And when the bin is full, you can **remove the bag from the side** rather than lifting it straight out.

QUIETEST TRASH COMPACTORS IN THE INDUSTRY.

In addition to a stylish look, a premium appliance should enhance the way you entertain by offering quiet performance. With our Whisper Quiet™ sound insulation system, KitchenAid® trash compactors are the **quietest in the industry**.
